**SmartPack® kitchens** are an easy and cost effective way to build a brand new designer-standard kitchen. You get the kitchen you want to your design, to your space, to your choice of finish – so much better value than any other method. It is the smarter solution for tradespeople, builders and the do-it-yourselfer.

✓ **Flexibility and Personal Choice**

One door, cupboard or a whole kitchen – no problem or build in stages, or add on a laundry – again no problem.

✓ **Easy to assemble**

**SmartPack®** uses a unique cabinet construction system. It is totally screwless and uses an expanding cam and dowel system. The adjustable legs are fitted using an expanding rivet system with clip on kickboard. All pieces are labelled so the included instructions are easy to follow. This makes it quick and easy to assemble.

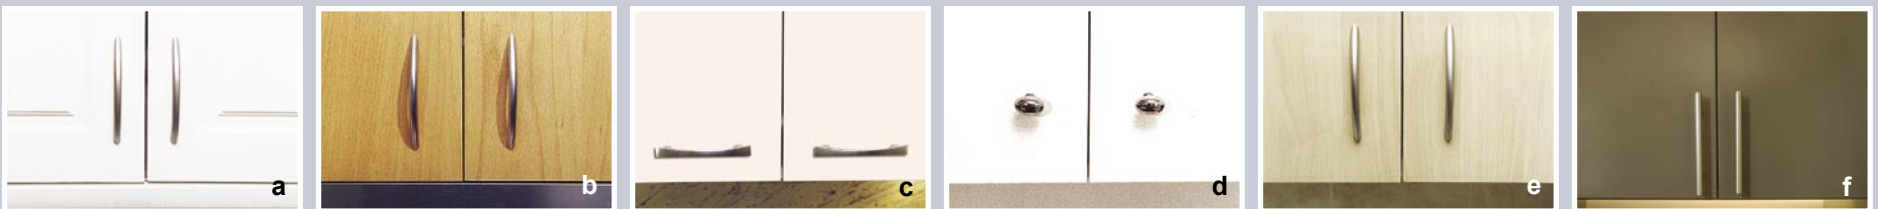

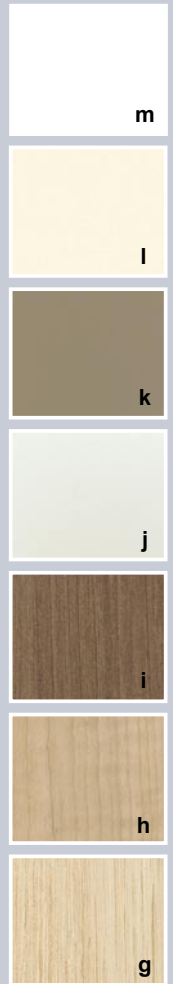

**Cam & Dowel System ● No Drilling ● No Screws ● Easy To Assemble**

✓ **Plus the Best Quality and a 7 Year Guarantee**

**SmartPacks** are made from the best quality materials. All the cabinets or units are made from Highly Moisture Resistant board – backs are 16mm, not masonite. We use BLUM METABOX drawers with solid bottoms and HETTICH clip on hinges (both with lifetime limited guarantees).

✓ **Solve any storage problem.**

**SmartPack®** is not just for kitchens and laundries. It can solve any storage problem anywhere in the home or business.

**STANDARD COLLECTION**

Zebrano Smart Veneer

### SMARTVENEER

**SMARTVENEER** is a restructured veneer finished in a clear satin (30% gloss) UV lacquer. Restructured veneer is made from real veneers but is characterised by the uniformity and evenness in colour and texture, while still offering the warmth and beauty of timber. The restructured veneer is impregnated with UV inhibitors and the UV Clear coating has very low yellowing properties, resulting in a product that will maintain its original colour much longer than natural timbers with polyurethane coatings.

**CUSTOM OPTIONS**

**BENCHTOPS**

- ✓ Special Colours and Shaped Laminate Tops
- ✓ Granite Tops
- ✓ Solid Timber Tops
- ✓ Stainless Steel Tops
- ✓ Caesar Stone and SmartStone Quartz Tops

**DOORS**

### LAUNDRY SOLUTIONS

Add on a laundry to match the kitchen using the standard **SmartPack®** system or just purchase a high gloss laundry cabinet and tub. Under bench laundry baskets and fold up ironing centres are available. We can even supply small sized tubs and bowls to fit any available space. Laundries can be built into a kitchen situation by using fold away pocket doors or full height bifold doors. Nothing is too difficult with **SmartPack®** solutions.

# Home Office SmartPack® is easy to install in any existing space

## A cost effective way to fit out your study, office or home office.

Like all the **SmartPack®** products the Home Office **SmartPack®** system is designed for the average do-it-yourself person. **SmartPack®** uses a unique construction system that is totally screwless. All Home Office cabinets are made with woodgrain melamine throughout and use high quality hardware components. All holes are predrilled with easy to follow assembly instructions included.

The benchtops are rolled edge high pressure laminate and are cut and joined to suit the room layout. Custom coloured benchtops can be made on request (3-4 weeks). Optional inset doors for bookcase or wall bookcase in custom colours can be made on request.

The new **SmartPack®** Tiltaway bed comes in Single, Double, Queen and King size beds and can be incorporated in the Home Office to convert any Study into a Bedroom or a Bedroom into a Study.

WORKSHOP

Hanging racks under bench for garden tools

Tool compartments locked and keyed for security

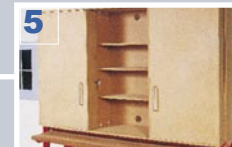

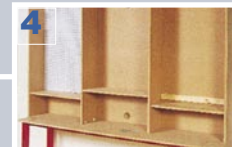

Solid timber heavy duty workbench

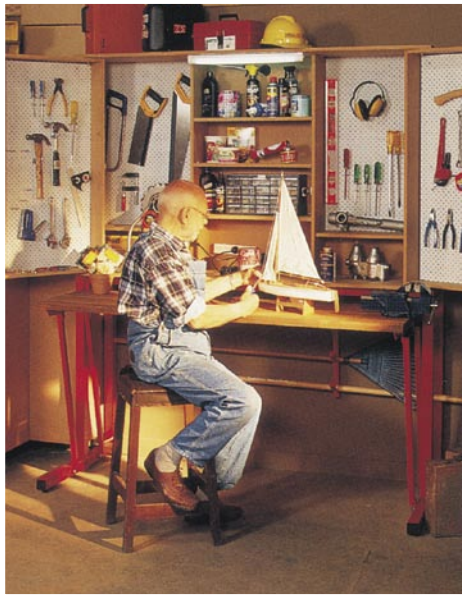

Simple construction

### IT'S THIS EASY

# Think of it as a very clever shed that comes in a pack and doesn't need space.

**A space of your own for hobbyists**

We created it because just about everyone wants some space of their own, but most of us don't have room for the good old-fashioned shed.

The Workshop **SmartPack**® is clever enough to give you everything a shed does, and more... yet tucks neatly against the garage wall, or wherever. Folds closed to demonstrate amazing smart space-saving and locks tools up safely. Beautiful heavy-duty solid timber workbench slides underneath.

**“It's the smartest invention since the screw”**

Like all **SmartPack**® products, we have designed the Workshop **SmartPack**® for absolute simplicity. We are sure that even a very average do-it-yourselfer will put it together easily in under two hours. **SmartPack**® uses a unique construction system that is totally screwless. It employs an expanding cam and dowel system and all holes are pre-drilled. And of course, quick-and-easy to assemble also means easy to take apart, stack away or shift. All pieces are distinctly labelled and detailed easy to follow instructions are included.

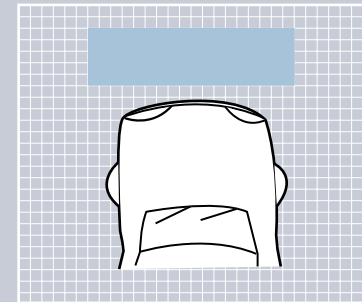

It can also look after your tools, go anywhere, help with your garden, keep things tidy, share your hobbies. And then disappear.

Optional side cupboards add extra storage. It all comes packaged, pre-drilled ready for instant easy assembly and packed with more features than a handyman's dream. With the Workshop **SmartPack**® you've got it made.

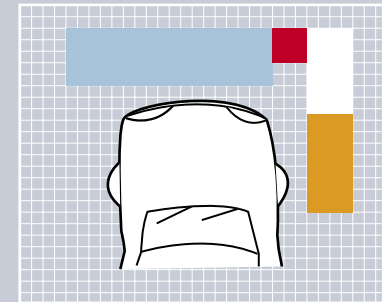

**It's not just blokes who need shed space**

# DESIGN YOUR OWN SmartPack®

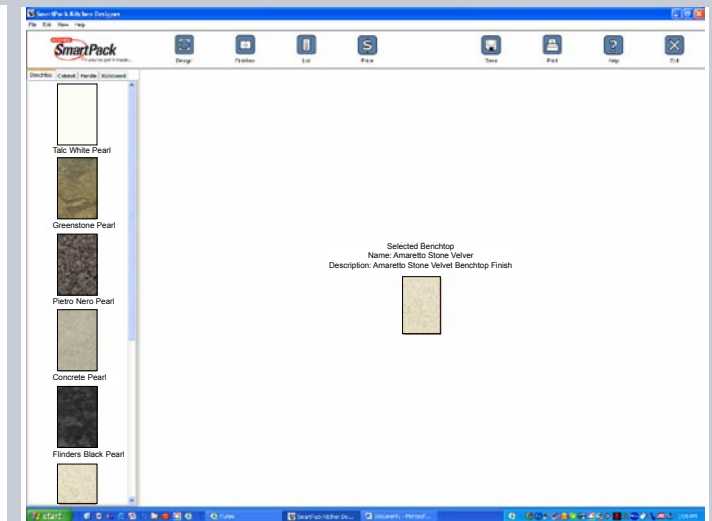

Go to [www.smartpackkit.com.au](http://www.smartpackkit.com.au) and download the Design Your Own SmartPack® (DYOS) file. Install the program on your desktop and follow the 6 easy steps outlined below, to design, select, price and order your kitchen SmartPack®.

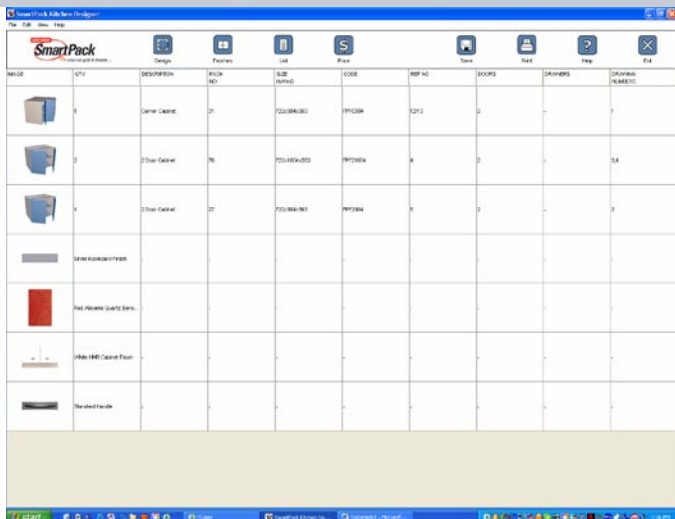

1. Open a new design and enter size of room and size and position windows and doors.

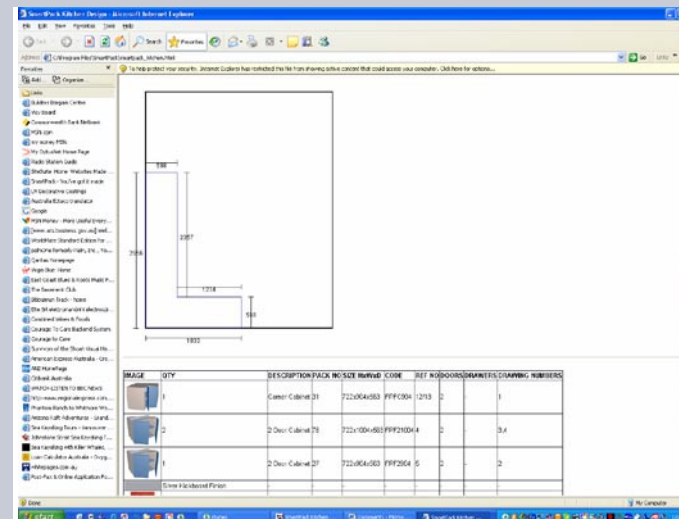

2. Position cabinet close to adjacent cabinet and it will align itself. The space available to the left and right of the cabinet is given in lower right corner of application.

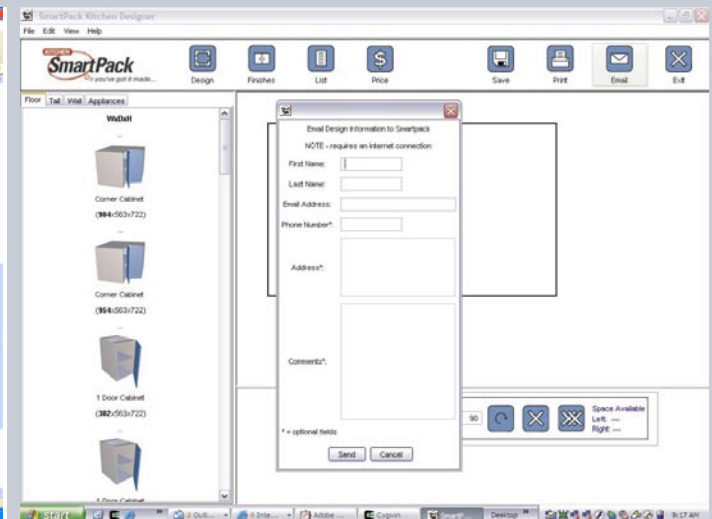

3. Select the Benchtop, Cabinet Door, Handle and Kickboard finish.

4. Select List from the Toolbar to preview the list of selected cabinets and finishes chosen.

5. Select Print to preview and print the kitchen design, benchtop layout, cabinet list, selection and filler panel list.

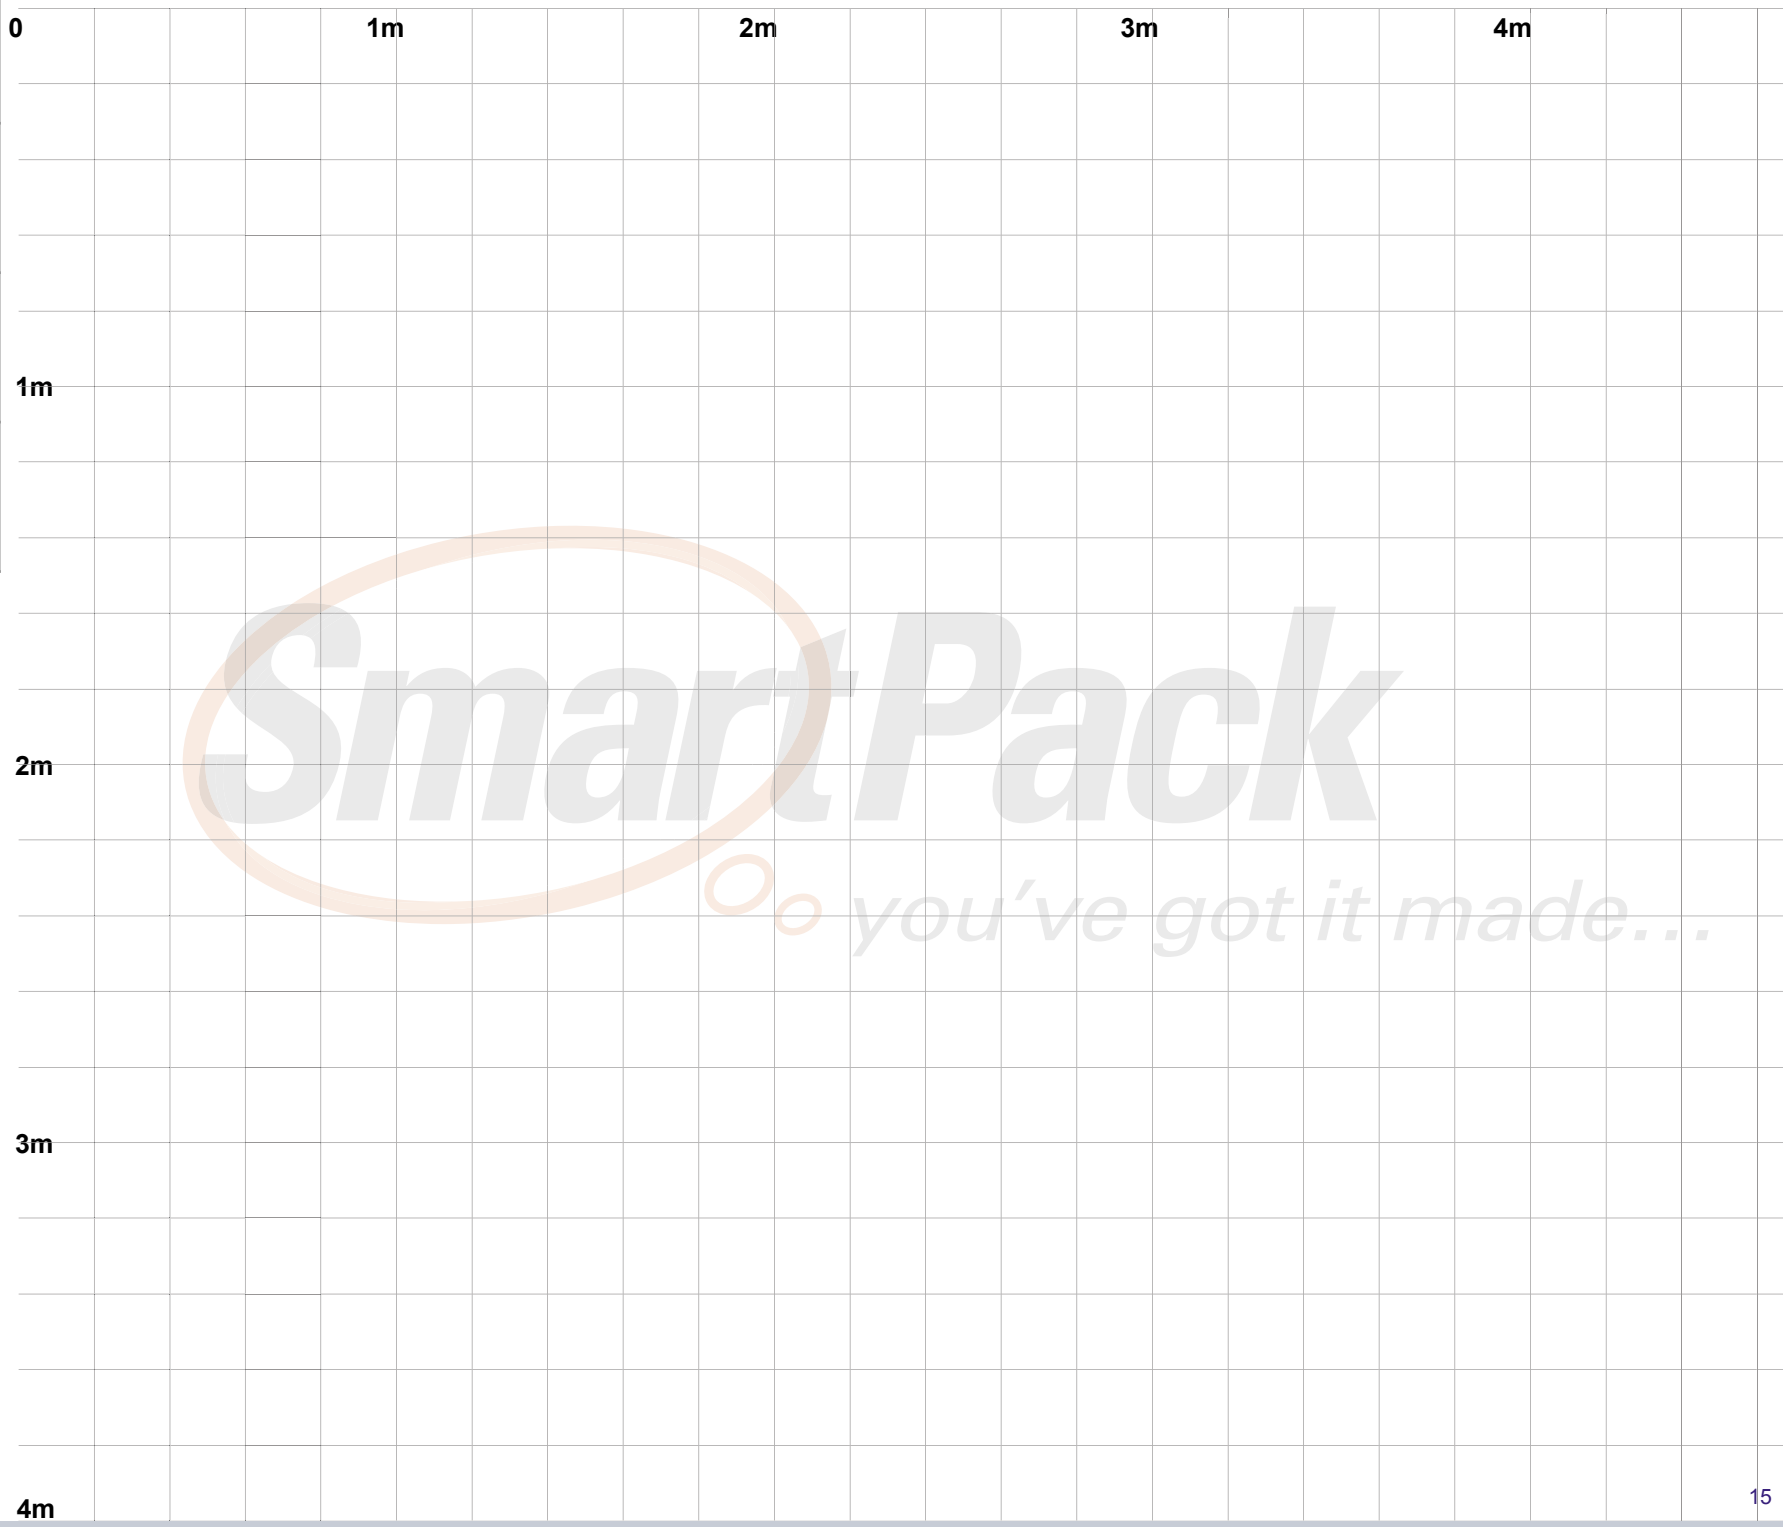

6. Select the Price tab on the Toolbar to get the price of your design. You can save the design or start another design. To email your order, click on the Email button, a SmartPack® representative will contact you once your email has been received.

OR USE THE TRIED AND PROVEN METHOD OF TEMPLATES AND STICK THEM ON THE GRID

Depth	Width	Height	
			Fridge
			Microwave
			U/B Oven
			Wall Oven
			Dishwasher
			Rangehood
			Upright Stove
			Sink
			Cooktop
			Hot Water Tank

### LAYOUT PLANNER

- ✓ Draw an outline of your room on the grid and position the pop out templates in the desired position.
- ✓ Extra cabinets can be obtained by cutting larger templates into two smaller ones along the dotted line.
- ✓ Window and door positions should be noted as well as any other extrusions i.e. gas pipes, power points, service ducts etc.
- ✓ Filler panels can be drawn in for any remaining gap
- ✓ Go to [www.smartpackkit.com.au/kitchen\\_ideas/layout\\_planner](http://www.smartpackkit.com.au/kitchen_ideas/layout_planner) to print out more templates from the website.
- ✓ Visit, fax or email your local SmartPack distributor to price your design.

## NOTES

- ✓ Best value for money I've seen
- ✓ Looks easy to assembly
- ✓ Uncompromised quality
- ✓ Standard doors, cabinets and benchtops ready to go
- ✓ They have everything Appliance Packages, Sinks and Mixers, and Accessories
- ✓ Huge range of options, cabinets and handles
- ✓ Give it a go!!
